PROJECT

Face Emotion Detection (Python, OpenCV) |

- Developed a system for real-time Emotion detection and recognition of Emotions and faces utilizing Python and OpenCV.
- Implemented image processing techniques (Haar cascades, ML models) for real-time detection.

Cyber intelligent Risk Assessment (Flask, Sqlite3, Jupyter Notebook) |

- This project proposes a machine-learning-based risk assessment system to detect and prevent security threats in IIoT networks.
- The main goal is to build an intelligent system that can accurately detect and manage cyber risks in Industrial IoT environments.

Banking Chat bot (HTML, CSS, JavaScript, WebSockets) |

- Designed and developed an interactive Banking chatbot web application with real-time conversational capabilities using JavaScript and WebSocket communication.
- Implemented persistent chat storage and responsive UI to support dynamic, multi-topic interactions and deliver seamless real-time user experiences.
